DOCKET FILE COPY ORIGINAL

To whom it may concern:

This is a letter of appeal of a USAC Decision made on 10/13/2014 for the Oregon School District 220, BEN 135878, Form 471 Application Number 939645, FRN 2612998.

The amount of funding requested on the application was listed incorrectly on the Form 471, due to an M/C error. The funding request was reviewed by USAC and the contract award date was corrected. The reviewer did not correct the funding amount that was supported by the contract.

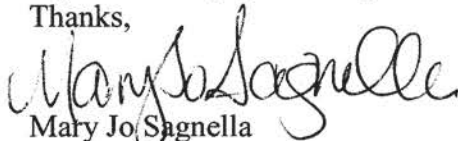

While applicants have a responsibility to apply for the correct amount, PIA reviewers should have the same responsibility. If the amount requested on the application was higher than what the contract supported, the reviewer would have insisted on a correction. This same reasoning should apply if the amount on the contract was lower than requested. This did not happen.

This is not a case of waste, fraud or abuse. We simply want to be funded for the amount supported by the contract.

Please correct the pre-discount amount from \$7,200.00 to \$14,400 as supported by page 8 of the attached contract.

If you have any questions please don't hesitate to contact me.

Thanks,

Mary Jo Sagnella
Director of Operations
